RE: M/700 TRIGGER REPLACEMENT CAMPAIGN

Remington produced approximately 3mm M/700 rifles from 1962 to date. The attached sheets detail production figures and costs to replace trigger assemblies on the M/700 rifles in the field.

The costs do not include any new equipment necessary to manufacture the trigger assemblies.

The return rate is estimated at 30%. All new trigger assemblies would not have a bolt lock feature. Costs are estimated at \$22.7mm
